HORIZON[®]

Memory Craft 9480 Professional

A NEW LEVEL IN

Creativity

MEETING YOUR NEED FOR *creativity*

Accurate Stitch Regulator
Maintain consistent stitch length while free-motion quilting.
A.S.R. Case supplied with machine including 4 x A.S.R. Feet (Open-toe, Closed-toe, Clear View & Ruler Work)

The Accurate Stitch Regulator incorporates a patented foot for Ruler Work **exclusive** to ASR.

Ample WORK AREA

More room for larger projects. The MC9480QCP provides 280mm (11") to the right of the needle. Add the extra wide extension table, which attaches to the machine by a built-in holding pin. The table is fixed and does not move and the work area has more than doubled.

BUILT-IN RETRACTABLE LIGHT

Who doesn't like more light? With the built-in retractable light, your work area lighting is significantly increased, making it easier to see more of the project at hand.

RESHAPED FRONT PANEL

The machine body above the needle area has been cut away on the MC9480QCP, this enhanced modification gives the user an increased view of the needle area and lets the retractable sewing light when extended, shine directly on the needle area.

BRIGHT & POWERFUL LIGHTING

The MC9480QCP is a well-lit machine, featuring lighting in four different locations, including the inside arm, on either side of the needle area and the retractable sewing light, which is made for sewing in any light... day or night.

CONVENIENCE AT YOUR FINGERTIPS

The machine function keys and buttons are conveniently grouped on the top panel, making them easily accessible and visible, no matter how big the project. (Reverse, Auto Lock-off, Needle up/down, Presser foot lifter, Thread cutter, Speed control slide, Start/Stop button). A new colour on the Start/Stop button to BLUE now accommodates to people with colour vision impairment. Once the button is pressed, it will change to RED which means the machine is in use.

A NEW ENHANCED SCREEN

Enjoy the impeccable clarity and vibrancy of graphics and colors on the 5" High Definition color touchscreen, giving you a premium sewing experience. The screen is thoughtfully elevated and angled to ensure better visibility and a more comfortable sewing experience. In Setting Mode you can customise the screen colours and functions to suit your personal style.

SUPERIOR NEEDLE THREADER V2

Threading couldn't be easier! Set your thread, push the lever on the left side, release and sew! This time saving feature allows you to get sewing faster. Its advanced design feeds the thread through the eye of the needle with precise accuracy every time.

USB PORT

Free up your internal memory by storing your created stitch patterns onto a USB drive. You can use up to 100 characters to create your own unique stitch combinations using the built-in designs and alphabets or why not extend your creativity and design your own stitches using Janome's specialised Stitch Composer software, enabling you to create your stitches and effortlessly transfer them to the machine via the conveniently situated USB port on the right-hand end of the machine.

ENCODER DIALS

Effortlessly modify stitch length and width with the simple, smooth rotation of the applicable encoder. This enables rapid stitch editing, whether it involves adjusting stitch width and length on the fly during sewing, adapting stitch settings prior to sewing commencement. Make piecing easier by honing needle positions for a scant quarter inch and save as a favourite stitch. Alternatively, you can adjust the stitch settings directly on screen.

ONE-STEP PUSH NEEDLE PLATE CONVERSION

No screws or tools necessary! Simply push the lever to release the plate and place a new one in place. The MC9480QCP comes with three standard needle plates: ZigZag 9mm, Straight Stitch and the Professional Grade HP plate. This machine can detect the attached needle plate and only display the stitches applicable to that needle plate.

NEW DESIGN FEED DOGS

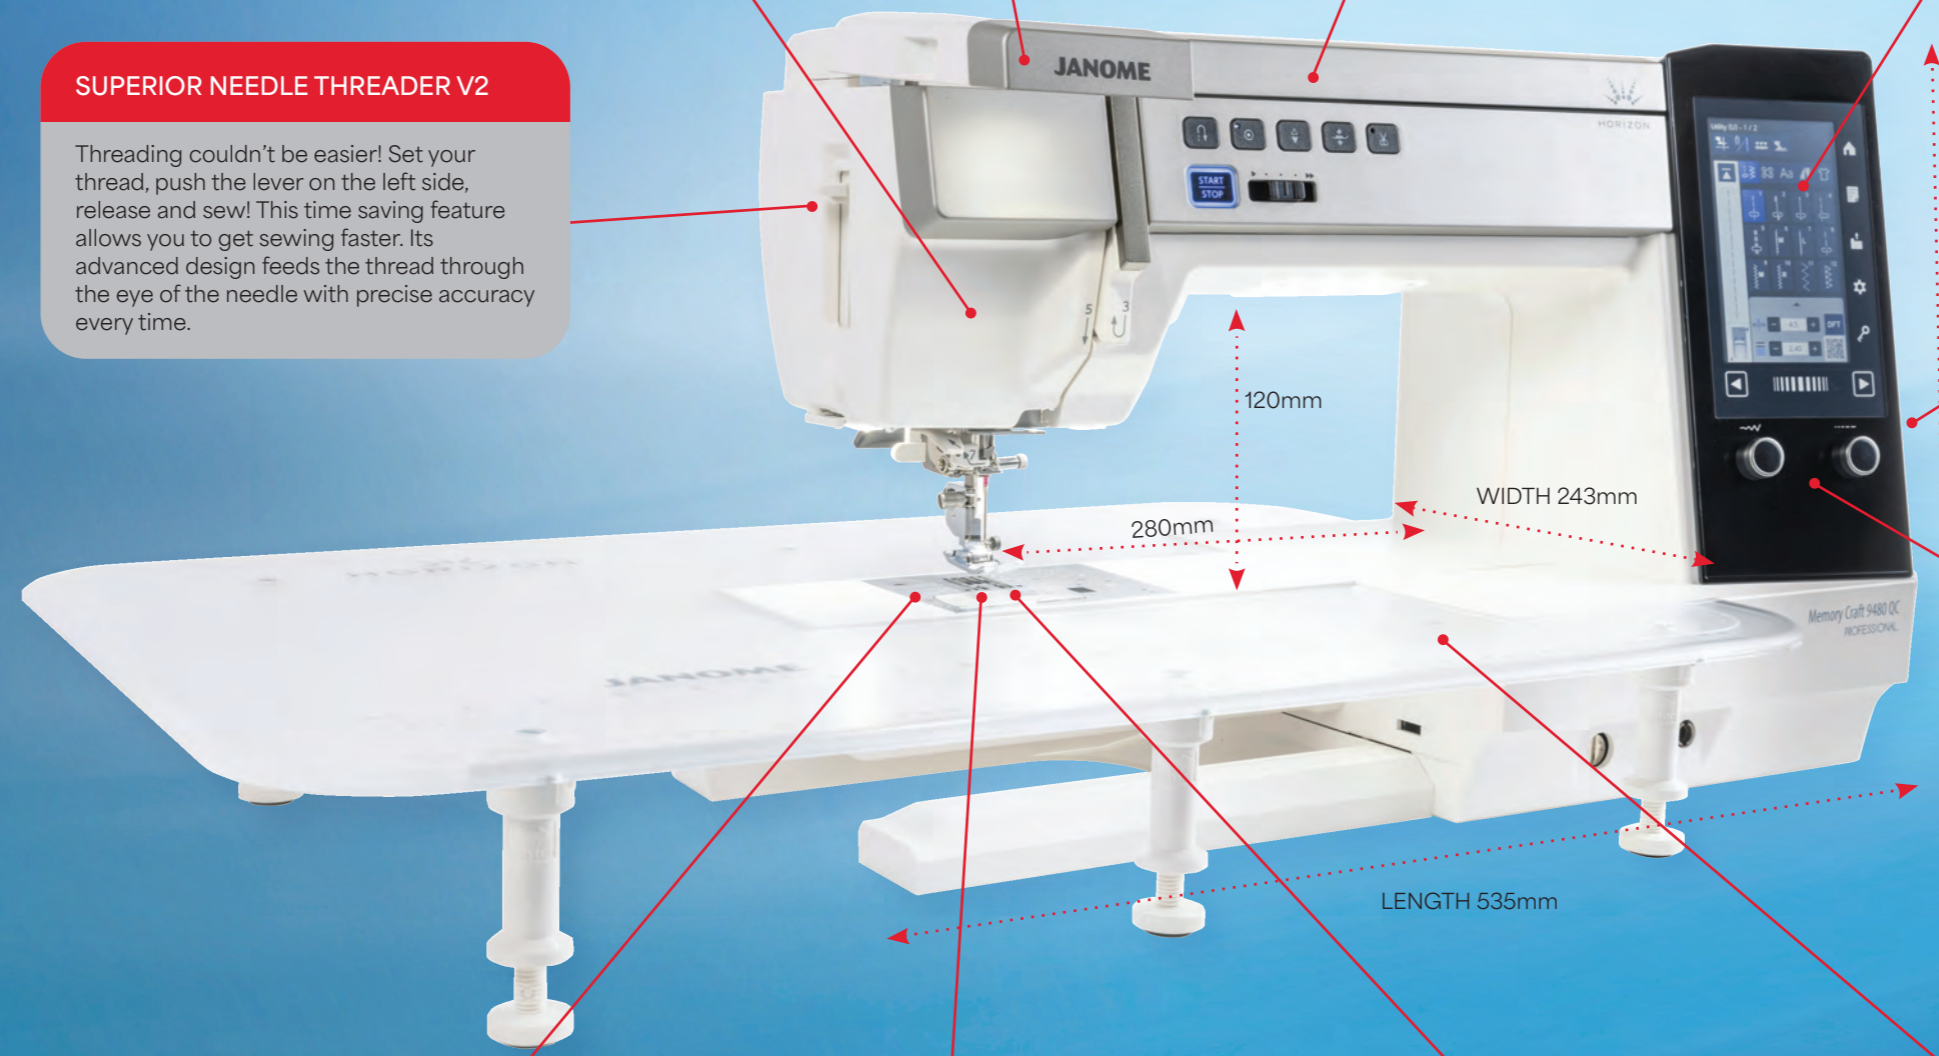

The new 7-piece feed dog design features sharper feed teeth, which are spaced tighter and higher together making them more precise for improved stitch quality. This new design works particularly well with difficult fabrics or multiple layers of fabric.

ACUFEED FLEX

AcuFeed Flex is Janome's integrated upper feed system, which works in conjunction with the lower feed system to perfectly feed your fabric from the top and bottom. Perfect for quilts, plaids, matching striped fabric and sewing application that requires precise control. The dual feed adjustment dial is conveniently located on the right-hand end of the machine.

GENEROUS WORKSPACE

Large sewing area with 280mm (11") to the right of the needle. With a 120mm (4.9") workspace height, you'll complete any sewing project with ease. Add the extra wide extension table, which attaches to the machine by a built-in holding pin, creating a huge flat work area.

ACCESSORIES

A large array of accessories are supplied with this model. They include 25 feet, four of which are the **NEW** A.S.R. feet.

SUPERIOR NEEDLE THREADER V2

The *new* design of this needle threader allows the thread to pass completely through the eye of the needle, giving you quicker and more precise threading.

HELPING YOU *do more*

Available for Smart phones / Tablets iOS 14.0 or later, Android 8.0 or later.

AcuSpark2 is an app that explains how to use the sewing machine and provides useful tips. Read the QR code displayed on the sewing machine screen with AcuSpark2 and all your questions will be answered. AcuSpark2 can also be used without a sewing machine. The app acts as a concierge, offering support and inspiring new ideas.
